list the riots since 2000 in the uk by motivation kind (economic, religious, immigration, ethnic, ...) security level threat, number of participants, number of police, severity (injuries, deaths, violence)

Quick Answer

The available search context primarily details the **2024 United Kingdom riots** and the **2011 England riots**, providing insufficient data to comprehensively list all UK riots since 2000 across the requested dimensions. The following summaries are derived strictly from the provided text.

2024 United Kingdom Riots

- **Motivation:** Far-right **anti-immigration** and **Islamophobic** sentiment, fueled by misinformation regarding the Southport stabbings.
- **Participants:** Approximately **29 demonstrations** across 27 towns/cities; specific crowds ranged from 200 to 1,000+ in initial incidents.
- **Police Presence:** Largest mobilization since 2011; **6,000 riot police** on duty with 2,000 in reserve.
- **Severity: 3 deaths** (victims of the initial stabbing); **361+ officers injured**; **1,840 arrested** (1,103 charged); widespread arson, looting, and attacks on mosques and asylum seeker hotels.

2011 England Riots

- **Motivation:** Initially triggered by the police shooting of **Mark Duggan** (**ethnic/racial** tensions); spread via **copycat violence** and **looting** (economic/criminal opportunism).
- **Participants:** Over **20,000 people** involved nationwide; **141 rioting incidents** across 66 locations.
- **Police Presence:** Mass deployment of police forces across England.
- **Severity: 5 deaths** (3 in Birmingham, 2 in London); **205 injuries** (186 police officers); **3,000+ arrested**; estimated **£200 million** in property damage.

Other Noted Incidents (Limited Data)

- **2001 Harehills Riot:** Classified as a **race riot** in England, but specific metrics for participants, police numbers, and severity are not detailed in the provided context.
- **2010 UK Student Protests:** Mentioned in London lists but lack detailed security or casualty metrics in the source text.
- **2020 Black Lives Matter Protests:** Violent disorder occurred in Whitehall, London, but specific statistics are not provided in the context.

Note: The search context does not contain sufficient data to list all UK riots since 2000 with the requested level of detail (participants, police numbers, severity) for incidents other than 2011 and 2024.

list the number of riots in the uk and the republic of ireland since 2000

Counted UK and Ireland riots since 2000

Based on the compiled lists from Wikipedia and other sources, here is an approximate count of distinct riot events since 2000. The exact number depends on how broadly "riot" is defined (e.g., whether to include violent protests, football hooliganism, or sectarian unrest).

United Kingdom

Region	Approx. Count	Notable Examples
England / Wales / Scotland	**~25**	2001 Oldham, Harehills, Bradford; 2 Birmingham; 2011 England riots; 20 2026 Southampton
Northern Ireland	**~15**	2001 Holy Cross & July/Nov Belfast 2011, 2012, 2013 Belfast; 2018 & 2(2021 NI; 2025 Ballymena; 2026 NI
UK total	**~40**	

England/Wales/Scotland breakdown by type:

- **Race/immigration:** 2001 Oldham, Harehills, Bradford; 2005 Birmingham; 2019 Oldham; 2024 UK riots; 2024 Harehills; 2025 anti-immigration protests; 2026 Southampton
- **Sectarian/ethnic (NI):** all 15 Northern Ireland events above
- **Anti-capitalist/protest:** 2000 & 2001 May Day; 2009 G20; 2010 student protests
- **Football/hooliganism:** 2002 New Den; 2004 Euro riots; 2008 UEFA Cup; 2009 Upton Park
- **Other:** 2010 Glasgow park; 2020 BLM disorder; 2022 Leicester; 2023 Derbyshire; 2019 Harehills bonfire

Republic of Ireland

Approx. Count	Notable Examples
~5–6	2004 May Day (Dublin); 2006 Dublin riots; 2010 student protes **Dublin riot**; 2024 Coolock protests; 2025 Citywest/Saggart riot

The **2023 Dublin riot** (Nov) and the **2025 Citywest riot** (Oct) were the most significant, both driven by **anti-immigration** sentiment. The 2024 Coolock protests were prolonged and involved repeated arson and clashes with Gardaí.

Key caveats

- Northern Ireland's sectarian riots (loyalist vs. republican) are numerous and recurring, inflating the UK count significantly.
- Some entries (e.g., 2010 student protests, 2009 G20) are borderline between "riot" and "violent protest."
- The 2024–2026 anti-immigration wave has produced multiple discrete incidents across both the UK and Ireland that may not all be counted as separate "riots."

list the number of terrorist incidents carried out and terrorist incidents interdicted since 2000

🔍 Counting UK & Ireland terror incidents since 2000

Here's what the data shows, with important caveats about definitions:

UK – Carried-Out Terrorist Incidents (2000–2025)

The Wikipedia table for "Terrorism in the United Kingdom" (which includes Northern Ireland) gives:

Period	Incidents	Deaths
2000–2009	~316	~25
2010–2019	~841	~56
2020–2025 (est.)	~130+	~20
Total	**~1,300**	**~100+**

The 2010s spike is driven heavily by **Northern Ireland dissident republican attacks** (118 in 2009, 239 in 2010, and similar numbers through 2013–2017). Great Britain

alone saw far fewer – the deadliest single year was 2005 (7/7, 57 deaths) and 2017 (Westminster, Manchester, London Bridge, Borough Market – 42 deaths).

Statista's separate count (likely using a narrower definition) gives: **325** in the 2000s, **925** in the 2010s, and **~130** in the 2020s to 2021.

UK – Interdicted / Foiled Plots (2000–2024)

Official figures for **late-stage plots** (i.e., plots with a concrete attack plan that were disrupted before execution):

Period	Plots Foiled	Source
2000–2005	~5–8	Various (Birmingham 2001, 21/7 2005, etc.)
2005–2013	**34**	MI5 Director General, Nov 2013
2017–2023	**39**	CONTEST strategy, 2023
2017–2024	**43**	MI5 DG, Oct 2024
Total (2000–2024)	**~85–90**	

Breakdown by ideology (2017–2024): 18 Islamist, 12 extreme right-wing, 2 LASIT (left/anarchist/single-issue), remainder unclassified or from earlier periods.

A C4 News fact-check (2013) noted that "about three times as many plots have been foiled than have actually been carried out" since 9/11.

Republic of Ireland – Carried-Out Incidents (2000–2025)

Far lower volume than the UK:

Source	Figure
NationMaster (2000–2006)	**5** incidents

Statista (peak year 2014)	**33** in a single year
GDT via Statista (2017)	**17** incidents
Rough total 2000–2025	**~100–150**

Most are **dissident republican** attacks (bombs, shootings targeting PSNI/army in the border counties, plus a few in the Republic proper like the Denis Donaldson killing in 2006 and the Cork City shooting in 2010). A small number are Islamist or far-right (e.g., 2023 far-right arson on a Dublin migrant camp).

Republic of Ireland – Interdicted Plots

No single official tally exists. Known foiled plots include:

- 2013: weapons cache discovered (Dublin/Clare)
- 2014: bomb discovered in County Louth
- 2015: Khalid Kelly (assassination plots, Prince Charles / Obama)
- 2016: CIRA shooting at boxing match (prevented escalation)
- 2017: suspected 8-man ISIS cell (western Ireland)
- 2022–2023: 30 arrests of suspected jihadists (2017–2022)

Estimated total: ~10–20 foiled plots since 2000.

Summary Table

	UK	Republic of Ire
Carried out (2000–2025)	~1,000–1,400	~100–150
Interdicted (2000–2024)	~85–90	~10–20
Fatalities (carried out)	~100+ (GB) / ~3,400+ (incl. NI history)	~5–10

Key caveats

- The UK figure is dominated by **Northern Ireland dissident republican violence**. Excluding NI, Great Britain saw roughly **50–80** carried-out incidents (mostly Islamist or far-right) over the same period.
- "Incident" definitions vary: the GDT/Wikipedia count includes attempted and minor attacks; CONTEST's "declared terrorist attacks" is a much narrower category (only 9 since 2018).
- The interdicted-plot count only covers **late-stage** plots (concrete plan, weapons, target). Early-stage disruptions (radicalisation, travel to conflict zones) are far more numerous but not counted here.

Plotted UK riot and terror trends since 2000

Here's a ready-to-run Python script that plots both trends with the official UK JTAC threat level as background columns:

```
import matplotlib.pyplot as plt
import matplotlib.patches as mpatches
import numpy as np

# ── Data (approximate annual incident counts, UK-wide incl. NI) ──
years = np.arange(2000, 2027)

# Riot incidents per year (from compiled lists: race, sectarian, protest, football, etc.)
riots = [2, 4, 1, 0, 2, 2, 0, 0, 1, 1, 2, 1, 0, 0, 0, 0, 0, 0, 0, 2, 1, 0, 1, 1, 1, 2, 2]

# Terrorist incidents per year (carried-out, all ideologies, incl. NI dissidents)
terror = [30, 35, 32, 30, 30, 35, 32, 30, 30, 62,
          150, 100, 90, 90, 85, 75, 70, 60, 55, 66,
          30, 25, 25, 25, 15, 10, 5]

# ── UK JTAC Threat Level periods (national) ──
# (start_year, end_year, level, color)
threat_periods = [
    (2000.0, 2009.5, 'SEVERE',      '#fde8e8'),
    (2009.5, 2010.0, 'SUBSTANTIAL', '#fff8e1'),
    (2010.0, 2019.75,'SEVERE',      '#fde8e8'),
    (2019.75,2020.8, 'SUBSTANTIAL', '#fff8e1'),
    (2020.8, 2021.1, 'SEVERE',      '#fde8e8'),
    (2021.1, 2021.9, 'SUBSTANTIAL', '#fff8e1'),
    (2021.9, 2022.1, 'SEVERE',      '#fde8e8'),
    (2022.1, 2026.3, 'SUBSTANTIAL', '#fff8e1'),
    (2026.3, 2027.0, 'SEVERE',      '#fde8e8'),
]
```

```
# Brief CRITICAL spikes (marked as thin red lines)
critical_dates = [2006.6, 2006.7, 2007.45, 2007.5, 2017.4, 2017.45, 2017.7, 2017.72]

# ── Plot ──
fig, ax = plt.subplots(figsize=(16, 7))

# Background threat-level shading
for start, end, level, color in threat_periods:
    ax.axvspan(start, end, alpha=0.35, color=color, zorder=0)
    mid = (start + end) / 2
    ax.text(mid, ax.get_ylim()[1] * 0.97 if ax.get_ylim()[1] > 0 else 145,
            level, ha='center', va='top', fontsize=8, fontweight='bold',
            color='#666', zorder=5)

# Critical spikes
for d in critical_dates:
    ax.axvline(x=d, color='red', linewidth=0.8, alpha=0.5, linestyle='--', zorder=1)

# Trend lines
ax.plot(years, riots, 'o-', color='#e65100', linewidth=2, markersize=5,
        label='Riot incidents (UK-wide)', zorder=3)
ax.plot(years, terror, 's-', color='#1565c0', linewidth=2, markersize=5,
        label='Terrorist incidents (UK-wide)', zorder=3)

# Annotate major events
ax.annotate('7/7\n(52 killed)', xy=(2005, 35), xytext=(2005, 65),
            fontsize=8, ha='center', arrowprops=dict(arrowstyle='->', color='gray'))
ax.annotate('2011\nRiots', xy=(2011, 1), xytext=(2011, 20),
            fontsize=8, ha='center', arrowprops=dict(arrowstyle='->', color='gray'))
ax.annotate('2024\nRiots', xy=(2024, 1), xytext=(2024, 15),
            fontsize=8, ha='center', arrowprops=dict(arrowstyle='->', color='gray'))
ax.annotate('NI dissident\npeak', xy=(2010, 150), xytext=(2012, 155),
            fontsize=8, ha='center', arrowprops=dict(arrowstyle='->', color='gray'))

# Labels & formatting
ax.set_xlabel('Year', fontsize=11)
ax.set_ylabel('Incidents per year (severity proxy)', fontsize=11)
ax.set_title('UK Riots vs. Terrorist Incidents 2000–2026\n(Background = JTAC National Threat
ax.set_xlim(1999.5, 2027)
ax.set_ylim(0, 165)
ax.legend(loc='upper right', fontsize=10)
ax.grid(axis='y', alpha=0.3)

# Legend for threat levels
patches = [mpatches.Patch(color='#fde8e8', alpha=0.5, label='SEVERE (attack highly likely)')
           mpatches.Patch(color='#fff8e1', alpha=0.5, label='SUBSTANTIAL (attack likely)'),
           plt.Line2D([0], [0], color='red', linestyle='--', linewidth=0.8, label='CRITICAL
ax.legend(handles=patches, loc='upper left', fontsize=8)

plt.tight_layout()
plt.savefig('uk_riots_terror_trends.png', dpi=150, bbox_inches='tight')
plt.show()
```

How to read it:

Element	Meaning
Orange line	Riot incidents (race, sectarian, protest, football) – spikes i 2011, 2024
Blue line	Terrorist incidents (all ideologies incl. NI dissidents) – don the 2010–2013 NI dissident peak
Red background	JTAC level = **SEVERE** (attack "highly likely")

Yellow background	JTAC level = **SUBSTANTIAL** (attack "likely")
Dashed red lines	Brief **CRITICAL** spikes (2006, 2007, 2017)

Key observations from the plot:

- The two trends are **inversely correlated** in the 2010s: as NI dissident terror peaked (2010–2013), rioting was low; as terror declined post-2018, riots surged (2024).
- The UK has been at **SEVERE** for ~14 of the 26 years; the longest SUBSTANTIAL stretch is 2022–2026 (4 years).
- st major civil disorder event during a "lower" threat period since 2009.

Caveats:

- Annual counts are approximations; the terrorism series is heavily skewed by NI dissident activity (excl. NI, GB sees ~3–8 incidents/year).
- "Severity" here is a **count proxy** – a single 7/7 (52 dead) and a single 2011 riot (5 dead) are weighted equally. For a true severity index you'd weight by fatalities × injuries × property damage.
